

Our Clients Speak

For more than a decade, RSRS has been a Canadian leader in medical record scanning. Our document bureau is outfitted with best-of-breed technologies and proven processes to ensure that the highest-quality scanned and indexed images are fully verified and delivered back to you promptly. Here are a few quotes from customers expressing their appreciation for RSRS' high standards in customer service and scanning quality:

The files were scanned very accurately. During the scanning process when we needed a chart, it was only a phone call away—it was immediately transferred to us electronically, password protected, and available for access. I would highly recommend RSRS to any of my colleagues who are looking to make their paper files electronically accessible.

► Dr. Edward Margolin M.D.

I appreciate your attention to detail, your understanding of my compliance rules and regulations, I would definitely recommend your services to any of my colleagues looking to lighten their load.

► Dr. Kevin Sliwowicz M.D.

I am writing this letter to thank you for the excellent work that your firm, RSRS, has done in the conversion of my patient records to electronic format. I would highly recommend your service to my fellow colleagues who are looking for a professional scanning company with an understanding of medical records, and can provide an excellent service at an excellent price.

► Dr. Mohammed A. Rahman M.D.

When I first asked you to take our clinic's paper files and convert them to digital format, I had a little trepidation. We were so used to shuffling paper, I

didn't quite know how we'd all adjust. Now that it's done, I have three words for you ... I LOVE IT!

Not only can we find any patient record within seconds, I'm also able to search through my records and find specific words that are common for all my patients (great for clinical trials).

I appreciate your ability to respond to our requests for individual records during the scanning process. It was comforting to know that even while you had our files, I actually had continuous access to the information.

► Dr. George Papadakis
O.D., F.A.A.O.

RSRS has a great professional team to work with. During the transition of scanning, when I needed to access an off premise chart for an insurance report etc, they made sure I could. I highly recommend RSRS for your scanning and storage needs. It was a complete pleasure working with the team.

► Dr Marla Shapiro M.D.
CCFP, MHSc, FRCP, FCFP, NCMP
